## **Chemspeed extends its Software Workflow Solutions Team with Tim Shay joining Chemspeed as Director Software Workflow Solutions**

Chemspeed Technologies, a global leader in the development of innovative automation tools for R&D laboratories, is happy to announce that Tim Shay has joined the company as Director of Software Workflow Solutions. Tim and his team drive enhancements, support, consulting, and implementation of software workflow solutions for Chemspeed automated platforms.

Chemspeed AutoSuite software is the interface of choice to pilot Chemspeed robotic platforms as well as to integrate third party hardware and software systems. As Chemspeed R&D automation tools have continued to expand from chemistry into diverse areas such as personal care, polymers, and catalysts, the need for unique software solutions to support these workflows steadily increases. Chemspeed is committed to further developing AutoSuite and VirtualLab (DoE, Data Management) as well as partnering with third party and / or customer solutions to support the informatics needs of our growing customer base. Tim brings over 15 years of experience in Enterprise informatics solutions to the Chemspeed team.

Over the past ten years, Tim has held a number of strategic positions, including Director, Field Application Scientists at Symyx Technologies as well as Director, Consulting Americas at Elsevier MDL, where he helped define Enterprise Informatics Solutions for customers in the Life Science, Chemical, Agrochemical and Consumer Products industries. Most recently Tim was Director, Major Accounts at PerkinElmer Informatics. Tim holds a PhD in Inorganic Chemistry from The Ohio State University and BS in Chemistry from Shippensburg University of Pennsylvania. He will be based in the Chemspeed US office in North Brunswick, New Jersey. Tim can be reached at [tim.shay@chemspeed.com](mailto:tim.shay@chemspeed.com).
